Art Unit: 1711

1. Claim 6 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. This claim lists a vinylether monomer, but claim one is limited to acrylate tertiary amine containing monomers.

2. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim one is confusing because defines the $R^1 - R^4$ groups as organic, but later claims and the disclosure show that they can be hydrogen. R and R^5 haven't been defined.

Claim 9 is confusing because claim one doesn't have an antecedent basis for "carboxylic acid".

Claims 9 and 12 are confusing because the kind of percent hasn't been defined – weight % or stoichiometric % ?
